UNIVERSITY SEMESTER EXAMINATION — AISC

Subject: Artificial Intelligence & Soft Computing (AISC) | Maximum Marks: 100

Section A & B Questions

Q1. (a) Define Admissibility and Consistency of heuristics in A* Search. (5 Marks)

Q1. (b) Explain Sigmoid activation function and its derivative. (5 Marks)

Q2. (a) Trace A* search on 8-puzzle problem with Manhattan distance. (10 Marks)

Q2. (b) Derive Backpropagation weight updates for multi-layer perceptron. (10 Marks)
