UNIVERSITY SEMESTER EXAMINATION — DC

Subject: Distributed Computing (DC) | Maximum Marks: 100

Section A & B Questions

Q1. (a) Define Lamport Logical Clocks. What are the clock conditions? (5 Marks)

Q1. (b) Explain the Bully Election algorithm with failure scenario of coordinator. (5 Marks)

Q2. (a) Differentiate between RPC and RMI with sequence diagrams. (10 Marks)

Q2. (b) Explain Vector Clocks and demonstrate causality detection. (10 Marks)
